***** Item Number 1 of 1 *****

DESCRIP :: PATENT
TITLE :: Aqueous dispersion of globular silicone rubber, used as an additive to e.g. lubricant - comprises cured silicone rubber, nonionic surfactant, ionic surfactant and water
ASSIGNEE :: SHINETSU CHEM IND CO LTD
PACODE :: SHIE
ACCNNO :: 455897
DATE :: May 25, 1999
ABSTRACT :: < BASIC> JP 11140191 A An aqueous dispersion of globular silicone rubber comprises 30-80 wt.% (A) : a cured silicone rubber having at least 70 mol % of a unit of Formula (I) in the molecule and an av. particle dia. of 0.1-100 micron, 0.1-30 wt.% (B) a nonionic surfactant, 0.01-10 wt.% (C) an ionic surfactant and the balance of (D) water wherein (B)/(C) is 100/100-100/0.1 by wt. In (I), R : 1-20C substituted or not-substituted monovalent hydrocarbon). USE - The dispersion is used an additive to aq. material such as lubricant, releasing agent, cosmetic additive, paint additive and additive for a synthetic resin, etc. ADVANTAGE - The aq. dispersion is improved storing stability compared to conventional ones, and gives antiblocking property or releasing property to cosmetics, paint, plastics material, etc. Dwg.0/0
